Under 37 CFR 1.97

This Supplemental Information Disclosure Statement is filed to report a search report from the European Patent Office dated 13 February 2004, with regard to application 00250412.4, which also claims priority from the same German application as the present case. As it is reported within three months of the search report and reports new references first cited by the search authority in the search report, it is timely filed without fee.

The filing of this Information Disclosure Statement shall not be construed as a representation that a search has been made (37 CFR §1.56(g)), an admission that the information cited is, or is considered to be, material to patentability or that no other material information exists.

The filing of this Information Disclosure Statement shall not be construed as an admission against interest in any manner. Notice of January 9, 1992, 1135 O.G. 13, at 25.

This Information Disclosure Statement is made to comply with the duty of candor imposed on all individuals associated with the filing or prosecution of this application, as defined by 37 CFR §1.56(c).

Three (3) US patents are listed on one (1) sheet of Form PTO/SB/08A. A copy

of each is provided.

Applicant respectfully notes that Reference FC is commonly-owned by the applicant Biotronik Mess- und Therapiegeraete GmbH Ingenieurbuero Berlin, and was co-pending in the US Patent Office with the present application, but it is included in this Information Disclosure Statement to provide all references that were not already of record.

Two US patents cited in the search report are not cited, as having been previously made of record in the case.

The search report is also included herewith.

The foregoing Information Disclosure Statement is based upon the information known to the inventor or contained in the undersigned attorney's file as of the filing date of this statement and is inclusive of the best information known to each of the undersigned at that date.
